StructureScan Professional by GSSI

Complete GPR System for
Concrete Inspection and Analysis

www.WeInspectTexas.com

StructureScan Benefits

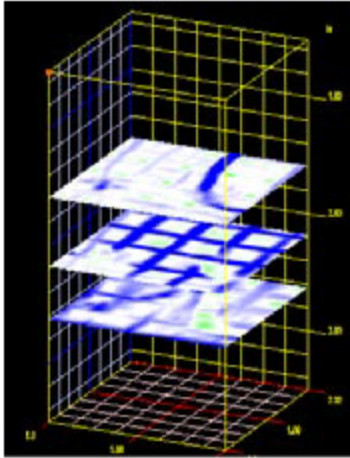

- Inspect floors, walls, decks, slabs, tunnels, balconies and garages
- Locate rebar, tension cables, conduits, voids, PVC pipes, and measure slab thickness
- Thousands of square feet of concrete can be inspected in a day
- Locate targets to a depth of 18 inches or more in concrete
- Faster, safer and lower cost than radiography (X-ray)
- Made in the U.S.A.

Know what's in the concrete before you cut!
